

**Lundi 15 décembre**

- 9:20 *Overture*  
9:30 **Nolan Wallach** Generalized Whittaker vectors and Jacquet integrals for parabolically induced representations  
10:20 *Pause*  
11:00 **Jacques Faraut** Fock models for minimal representations  
12:00 **Erik van den Ban** Paley-Wiener theorems for groups and symmetric spaces  
13:00 *Déjeuner*  
14:30 **Birgit Speh** Cuspidal representations of reductive groups  
15:20 *Pause*  
16:00 **Patrick Delorme** A Paley-Wiener theorem for Whittaker functions on a reductive p-adic group  
17:00 **Gregory Landweber** Off-shell representations of the super Poincaré group

**Mardi 16 décembre**

- 9:30 **Michel Duflo** Weyl's functional calculus and equivariant differential forms  
10:20 *Pause*  
11:00 **Bent Orsted** Representation theory and functional determinants on spheres  
12:00 **Pavle Pandžić** Dirac cohomology of Harish-Chandra modules  
13:00 *Déjeuner*  
14:30 **Alexander Lubotzky** Simple groups of Lie type as expander graphs  
15:20 *Pause*  
16:00 **Rajagopalan Parthasarathy** Representation theoretic harmonic spinors for coherent families  
17:00 **Pierre Pansu** Flexibility of surface groups in semi-simple Lie groups  
18:30 *Dîner*

**Mercredi 17 décembre**

- 9:30 **Jean-Philippe Anker** Evolution equations in negative curvature  
10:20 *Pause*  
11:00 **Leticia Barchini** Certain components of the Springer fiber for classical groups  
12:00 **Roberto Miatello** Lattice points for Hilbert modular groups  
13:00 *Déjeuner*  
14:30 **Emmanuel Ullmo** Équidistribution de mesures adéliques sur les espaces homogènes  
15:20 *Pause*  
16:00 **Werner Müller** The Selberg trace formula and dynamical zeta functions  
17:00 **Roger Zierau** The structure of certain components of Springer fibers  
19:30 *Visite nocturne au musée du Louvre*

**Jeudi 18 décembre**

- 9:30 **Dan Barbasch** Stable combinations of characters of unipotent representations  
10:20 *Pause*  
11:00 **Toshiyuki Kobayashi** Global geometry on locally symmetric spaces – beyond the Riemannian case  
12:00 **T.N. Venkataramana** Discrete components of restrictions of complementary series  
13:00 *Déjeuner*  
14:30 **Leslie Saper** L-modules and the cohomology of locally symmetric spaces  
15:20 *Pause*  
16:00 **Birne Binengar** HC-Cells, Nilpotent Orbits, Primitive Ideals, and Weyl Group Representations  
17:00 **David Vogan** Branching laws and signature for real reductive groups
